

# OSHA Compliance Support

Complying with all of the OSHA regulations is difficult, and most companies can use some assistance to ensure they can stand up to a comprehensive planned or unplanned inspection. CMI has assisted hundreds of companies to ensure they are meeting requirements by assessing the gaps, developing practical procedures and ensuring supervisors and employees are trained to implement them as part of their routine responsibilities.

- OSHA Gap Assessments (General Industry and Construction)
- Voluntary Protection Program (VPP) Support
- Citation or Complaint Response Assistance
- Policy and Training Program Development
- Compliance Audits and Corrective Action Systems
- Job Safety Assessments
- Safety Inspections and Tracking Processes
- Accident Investigation and Management Procedures
- Incident Metrics and Scorecards
- Bloodborne Pathogens Exposure Control
- Chemical Hygiene Plans for R&D Laboratories
- Confined Space assessments and Programs
- Control of Hazardous Energy (Lockout/Tagout) Procedures
- Electrical Safety Assessments and Arc Flash Studies
- Fall Prevention Programs
- Hazard Communication/GHS Labels and SDS Management
- Medical Emergency Procedures and First Aid/CPR Training
- Personal Protective Equipment (PPE) Assessments
- Powered Industrial Truck (Forklift/Highreach) Training
- Respiratory Protection Programs
- Spill Response Team Training (HazWoper)
- Trenching and Excavation

CMI was selected by a leader in electronic instruments and electromechanical devices with over 200 global locations to provide outsourced support on an as-needed basis. Assignments encompass all aspects of EHS compliance including safety systems, job safety analyses, accident prevention programs, safety committees, and environmental reporting/permitting.

CMI provides ongoing safety and industrial hygiene support to this global technology company that manufactures components for defense systems, aerospace, and electronics. Services provided include safety and environmental audits, risk assessments, industrial hygiene services, safety program development, and temporary onsite EHS support.

CMI provides outsourced safety services for this company's four precast concrete manufacturing facilities. Services include lockout/tagout, PPE, hearing conservation, confined space, hazard communication, and safety training. In addition to ongoing safety services, CMI has also completed various environmental services including NPDES and SPCC planning, air permitting, and training.
