

Loss Prevention

Our team of Certified Safety Professionals (CSP), Certified Industrial Hygienists (CIH), injury prevention and fleet safety professionals can assist policy holders to support loss prevention through development or optimization of safety programs in areas including:

- Needs Assessment and Loss Analysis
- Workplace Safety Inspections
- Safety Policy and Procedures
- Underwriting Risk Assessments for Property and Casualty Lines
- Fleet Safety Programs
- Industrial Hygiene and Ergonomic Assessments
- Injury Investigation and Management Procedures
- Job Safety Assessments

CMI's team of professional trainers can also work with you to create loss prevention training programs designed to improve your safety performance. This includes programs geared toward managers and supervisors as well as employees. We can provide train-the-trainer programs as well as instructor-led programs in the following areas:

- Accident and Injury Investigations
- Safety Committee Optimization
- Ergonomics and Safe Lifting
- Inspections for Incident Prevention
- Preventing Slips, Trips, and Falls
- Fall Prevention/Ladder Safety
- Safety Management for Supervisors

CMI provides risk assessment services for this insurance carrier specializing in municipal coverage. The risk assessments are designed to evaluate management practices, written policies, programs, and employee training in the organizations. The assessments include records reviews, interviews and site inspections to assess safety policies, employee relations, facility maintenance, and vehicle/fleet safety.

CMI performs health care risk management assessments for this insurance company specializing in solutions for not-for-profit healthcare organizations including nursing homes, assisted living, and rehab facilities. CMI's risk assessments evaluate the facility and operational practices including written policies, programs, and training and are designed to identify risks and improve safety performance.

CMI is the sole-source provider of loss prevention and industrial hygiene services to this workers' compensation and claims service for public schools systems. This support includes provision of safety assessment and safety training support, including delivery of highly engaging centralized seminars and training programs. It also includes safety inspection, compliance support, and industrial hygiene services.
