

## Partnering Services

As workers' compensation costs skyrocket and compliance with OSHA and environmental regulations becomes more onerous, companies find that available resources for their EH&S programs are limited. For over fifteen years, CMI has offered companies an alternative to hiring a full-time professional or continuing to assign EH&S responsibilities to over-committed and under-trained managers. Our "Partnership Program" provides a staff of trained professionals to act as your regulatory affairs department. CMI has partnered with over 50 companies nationally to ensure a cost effective compliance model.

## Implementation in Five Easy Steps

- Conduct an EHS assessment of your facility
- Develop proposal and strategic plan
- Develop regulatory compliance schedule
- Execute regulatory compliance activities
- Conduct reviews to periodically assess compliance

Entering into a Partnership with CMI is a simple and cost effective way to manage your compliance. Your individually designed program will begin with a team of experts experienced in your specific industry sector conducting a detailed compliance audit. Following the audit, the team will review the audit findings and prepare the audit report. Your assigned Account Manager will then work with you to select the appropriate corrective action for the EHS compliance deficiencies discovered at your facility.

## Benefits of Partnering with CMI

- Reduction of direct costs by up to 50%
- Freeing staff to concentrate on core business
- Decreased liability for fines, penalties, workers' compensation and legal action
- EHS program managed by experts
- Guaranteed Compliance
- Allows accurate budgeting at a fixed monthly cost
- Telephone support from our trained EHS professionals
