## About CMI

For over 24 years, CMI's experienced personnel have successfully provided high quality testing services to hundreds of utility, industrial, and municipal clients. In addition to regulatory compliance service, CMI routinely supplies technical support for plant maintenance and process evaluation.

General project history includes:

- Compliance stack tests, new source permits
- Process control and evaluation
- Hazardous and pathologic materials incinerator test burns
- IPP cogeneration facility startup certification testing
- Emission control device performance evaluations
- Air flow studies
- Combustion source optimization (incinerators and boilers)
- Gas stream characterization for control device design
- Mobile CEM testing & audits
- Landfill Gas Combustion

## Process & Air Pollution Control Equipment Evaluations and Recommendations

Wet Scrubbers	Dryers / Evaporators	Chemical Processes
Baghouses	Boilers & Furnaces	Fume Incinerators

CMI's stack testing service division is a full service environmental testing and technical services company with strong capabilities in stack emission monitoring. Acting as an agency liaison, we provide advocacy for our clients as well as prepare permit applications, modifications, conduct BAT/RACT analysis, and prepare AIMS reports.

For compliance tests, process evaluations, efficiency studies, control device maintenance, or emission characterization for control equipment design, CMI's stack testing division will put together an efficient, cost effective test program to meet your needs.

## Typical Industries Served

Manufacturers	Steel and Primary Metals	Pulp & Paper
Metal Finishing	Food Processing	Landfills
Recycling	Resource Recovery	Milling & Machining
Electronics	Pharmaceuticals	Printing and Coating
Tank Terminals	Chemical Facilities	

## Contact us
