- DOT Training
- SWPPP Training

CMI recognizes that “one size does not fit all,” especially in today’s dynamic organizations. We offer unparalleled customization of content and delivery modes to fit the unique needs of our clients, as well as hands-on programs and services to meet your EHS training needs.

This global safety association selected CMI to assist in development of a new risk assessment certificate program. CMI developed customized content for the seminar and worked closely with the client to ensure the content, objectives and delivery methods were fully aligned with the organization’s vision. After the initial course development, CMI presented this highly sought after training to hundreds of professionals.

CMI is currently supporting a regional transportation authority’s safety department to deliver customized biohazard training, to approximately 850 employees who have potential occupational exposures to human blood or other potentially infectious materials (OPIM). Hands-on demonstrations and exercises were used to train maintenance custodians, drivers, janitors, police, millwrights and facilities personnel.

Through our EHS outsourcing programs, CMI conducts hundreds of training sessions to thousands of employees each year. Training sessions provided cover a range of environmental and safety topics including RCRA, HAZWOPER, SPCC, OSHA 10 & 30, Confined Space, Ergonomics, and PPE. See a complete list of our environmental and safety training services.
