

## COURSE DESCRIPTION:

The Resource Conservation and Recovery Act, or RCRA, is the standard enacted by Congress at the federal level which regulates the identification, transportation, treatment, storage, and disposal of solid and hazardous wastes. This program is intended to provide a basic knowledge on the different types of regulated waste and awareness on proper handling. This course will cover the RCRA regulation, employee responsibilities as well as waste recognition. The best way to deal with hazardous, universal, and special wastes is not to produce them in the first place. Where reduction is not possible then proper management is your best way of making sure you have a safe environment both at work and at home.

## REGULATORY REFERENCE:

40 CFR parts 260 thru 265

## APPROXIMATE DURATION:

25 Minutes

## COURSE OUTLINE:

1. Introduction
2. The RCRA Regulation
3. Defining Industrial Wastes
4. Listed Wastes and Waste Codes
5. Hazardous by Contact
6. Generator Classifications
7. Storage Requirements
8. Labeling and Storage Requirements
9. Employee Responsibilities
10. Transportation and Manifests
11. Treatment and Disposal Facilities
12. Emergency Response
13. Contingency Plans for Large Quantity Generators
14. Universal Wastes
15. Special Wastes
16. Waste Minimization
17. Summary

## HAZARDOUS WASTE

FEDERAL LAW PROHIBITS IMPROPER DISPOSAL

IF FOUND, CONTACT THE NEAREST POLICE, OR PUBLIC SAFETY AUTHORITY, OR THE U.S. ENVIRONMENTAL PROTECTION AGENCY.
