

COURSE DESCRIPTION:

This program is an overview of the general elements of an effective respiratory protection program to include the methods of selection, use, care, proper fit and medical clearance of respirators in the workplace. We'll also discuss when respirators may be needed and OSHA's guidance on voluntary use.

REGULATORY REFERENCE:

29 CFR 1910.134
ANSI Z88.2 – 2015

COURSE OUTLINE:

1. Introduction
2. OSHA Standard on Respiratory Protection
3. Training Objectives
4. Your Respiratory System
5. Respiratory Hazards
6. Oxygen Deficiency
7. Gases and Vapors
8. Particulate Contamination
9. Selection of Respirators
10. Air Purifying Respirators
11. Air Purifying Particulate Filters
12. Air Purifying Chemical Cartridge
13. Air Supplied Respirators
14. Airline Respirators
15. Self-contained Breathing Apparatus
16. Proper Respirator Fit
17. Respirator Use in an IDLH Atmosphere

APPROXIMATE DURATION:

30 Minutes

18. Respirator Medical Evaluation
19. Respirator Inspection
20. Respirator Care and Storage
21. Respirator Approvals
22. Summary
